CAREER OBJECTIVE

Detail-oriented Game Developer and Computer Science (AI) student skilled in Unity, C#, and C++. Proficient in object-oriented programming, game architecture, player controllers, and atmospheric mechanics. Proven ability to build engaging 3D gameplay systems and collaborate effectively within cross-functional software teams to deliver robust interactive experiences.

EDUCATION

Faculty of Computers and Artificial Intelligence, Benha University (BFCAI) **Expected Graduation: 2027**

B.Sc. in Computer Science and Artificial Intelligence

- **Relevant Coursework:** Data Structures, Algorithms, Artificial Intelligence, Problem Solving.
- **Graduation Project (Core Game Developer):** Collaborated in a 7-member cross-functional team (AI engineers, data analysts, and software developers) to design and execute a comprehensive technical system.

PROJECTS

Kitchen Chaos (3D Game) | Unity, C# **2025**

- Developed a complete 3D kitchen-themed game applying clean architecture and OOP principles based on CodeMonkey curriculum.
- Implemented core player movement, item handling logic, interactive counters, and UI update events.
- Structured modular and optimized C# scripts to maintain high frame performance and responsive user controls.

The Final Minute (Atmospheric Game) | Unity, C# **2026 – Present**

- Designing core high-tension gameplay mechanics and environmental interaction systems for an atmospheric game experience.
- Integrated customized player input controls and dynamic state handling in C#.

Horror Genre Game | Unity, C# **2026 – Present**

- Prototyping early-stage environmental mechanics and lighting systems focused on immersion and atmospheric audio-visual triggers.

EXTRACURRICULAR ACTIVITIES & COMPETITIONS

Egypt Game Jam — ITI Smart Village **2026**

Registered Participant

- Collaborated under tight time constraints with a game development team to brainstorm, prototype, and build a core game loop.

ACPC Kickoff Contest & Codeforces **2025 – Present**

Competitive Programmer

- Represented Benha University in the ACPC Kickoff Contest, solving complex algorithmic problems under time constraints.
- Continuously practicing data structures and competitive programming algorithms on Codeforces.

IEEE Delta Academy & WARZONE **2025**

Cybersecurity Participant

- Completed hands-on training in OSINT and Network Security fundamentals; executed simulated cybersecurity missions.

Manara Community **2025 – Present**

Active Member

- Engaged in peer-led study circles and software engineering review groups to share technical insights and code reviews.

TECHNICAL SKILLS

Game Engines & Languages: Unity, C#, C++

Architecture & Systems: Gameplay Mechanics, Player Controllers, Input Systems, Object-Oriented Programming (OOP)

Tools & Version Control: Git, GitHub, Notion

Languages: Arabic (Native), English (Very Good)
